## REASONS FOR ALLOWANCE

### *Amendment*

The title has been amended to be more clearly indicative of the invention to  
5 which the claims are directed.

### *Response to Arguments*

Applicant's arguments, see Remarks p. 5, filed December 21, 2004, with respect  
to claims 1, 2 and 4 have been fully considered and are persuasive. The rejections of  
10 claims 1, 2 and 4 have been withdrawn.

### *Terminal Disclaimer*

Applicant has assented (Remarks, p.5) to submission of a terminal disclaimer  
upon allowance of the claims in order to overcome the nonstatutory double patenting  
15 rejection presented in the Office Action of September 22, 2004, in relation to U.S.  
Patent No. 6,791,609.

### *Allowable Subject Matter*

**Claims 1, 2, and 4** are allowed.  
20 **Claim 3** was allowed in the previous Office Action of September 22, 2004.  
Regarding claim 1, the non-commonly owned prior art is not found to teach or at  
least fairly suggest that at any given pixel location, employing a first interpolated color

value to correct a second interpolated color value. The claims are distinguished from the Adams reference (US 5,652,621), which does not employ the second interpolated color value when determining the first interpolated color.

Regarding claim 2, the prior art is not found to teach or fairly suggest, in  
5 combination with the claim from which dependence is derived, the color-filtered array having a Bayer pattern and the first of the interpolated colors being green.

Regarding claim 4, the non-commonly owned prior art is not found to teach or at least fairly suggest a color filtered array interpolator, employing three filters, in which a first interpolation filter is applied to a first color, a second interpolation filter is applied to  
10 a second color, and a third filter approximates a frequency region difference between the first and second filtered colors.
